Fax: +375(17) 284 19 17

The system ITA 2.1 is intended for statistical estimation of the influence of one of the factors on the trait under study. The system is a Microsoft Excel document with macros. Experimental data are introduced into one of the sheets. The system automatically compiles the table of the initial data division into classes as well as determines non-casual relations in the data table of the factors under study

Form of collaboration: Licensed agreements on transfer of rights.
