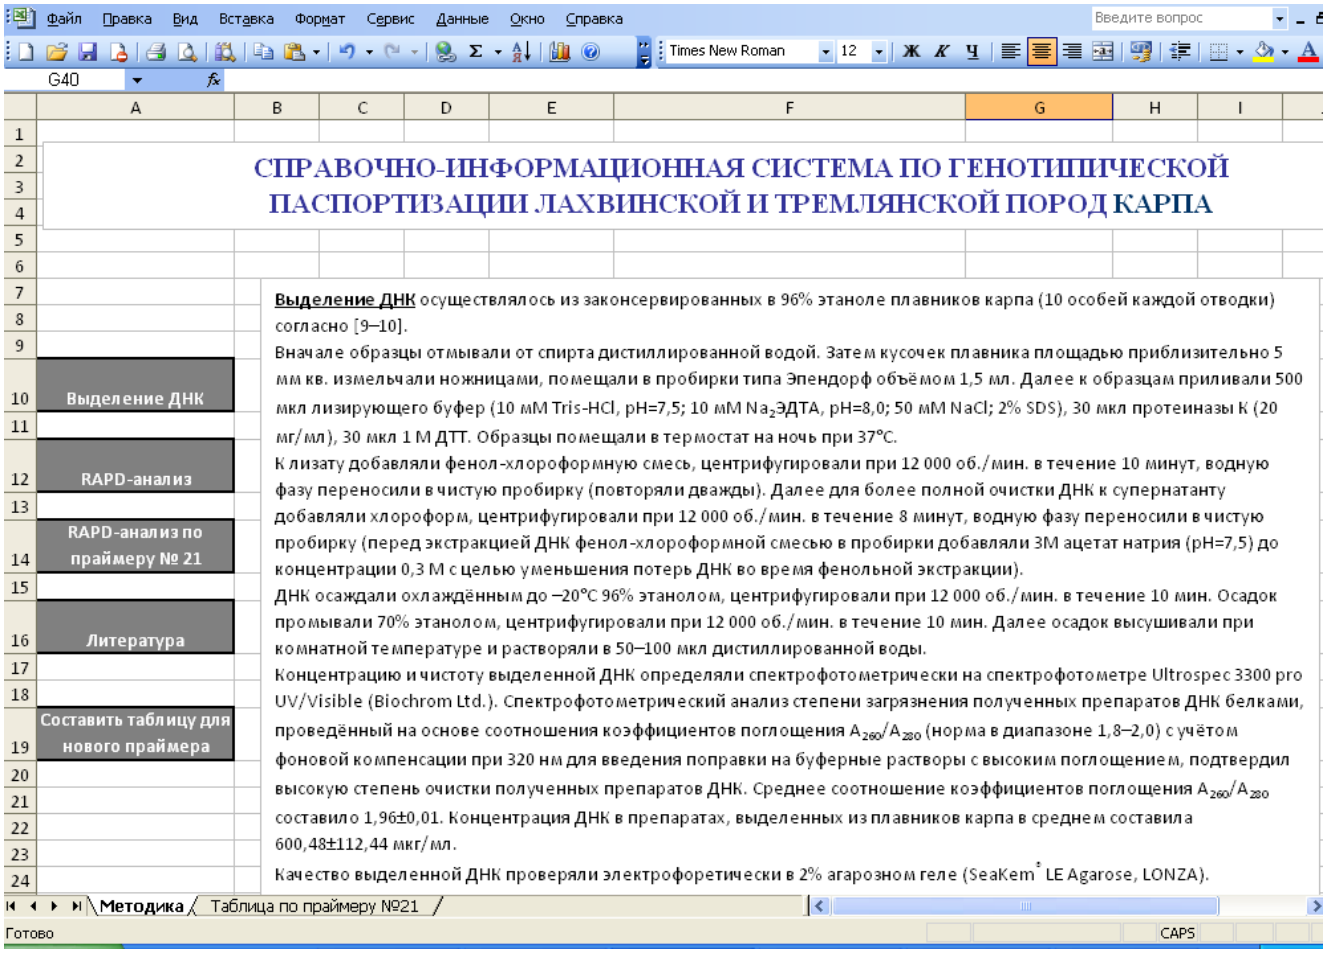
E-mail: S.Dromashko@iac.bas-net.by



The inquiry information system contains technique for DNA extraction, description of RAPD method and an example of its application in studies on genotyping of Lakhvin and Tremlyan carp species as well as the table of comparing spectra and frequencies of amplicons by the primer No.21 of Lakhvin and Tremlyan carp species intended for their certification. The given system was developed in view of its subsequent supplement with other results of genotyping different carp species and lines.
